

**Altiplano Reports Rapid Progress**  
**At The Historic Farellon Copper-Gold Mine in Chile**

EDMONTON, April 27, 2018 - Altiplano Minerals Ltd. (TSX-V:APN) (OTCQB:ALTPF) (FWB:9AJ1) (“APN” or the “Company”) is pleased to report progress in its exploration of the historic Farellon Copper-Gold Mine (“Farellon”) near La Serena, Chile, including a shift toward identification of new mineralized vein material.

CEO John Williamson stated, “The Company anticipates completion of our 5,000 tonne bulk sampling program at Farellon by the second week of May, which will be 7 weeks in total, versus the 12 weeks that it took for our initial 2,000 tonne bulk sampling program. We have charted our productivity (see Figure 1 below), which demonstrates an accelerated operating performance. We are committed to continuous improvement as we develop and test our capacity to extract up to 5,000 tonnes per month, while managing dilution and grade to achieve our target of 2% Cu. We will now expand our exploration program to different levels and extensions of the Farellon vein system in order to upgrade our inferred mineral resources.”

**Figure 1 – Productivity at Farellon**

During March 18 to 31st (weeks 12–13 in Figure 1 above), extraction of mineralized vein material at Farellon was deferred to complete an escapeway at the 235M Level, and the APN underground exploration team worked to remove waste for better airflow and access. Additionally, during this period the team added equipment to facilitate better operations, which is clearly reflected in the increased weekly productivity over the last 3 weeks.

The Company has extracted 3,745 tonnes of mineralized material as part of its ongoing 5,000 tonne bulk sampling program at Farellon. Of this material, 2,858 tonnes were collected from the 395M Level, and 887 tonnes were collected from 33.9m of development on the new 401.5M Sublevel. To date, 2,206 tonnes of this material have been shipped for toll milling, which remains in progress. The results of milling will be determined and reported in due course.

Osbaldo Zamora Vega, Ph.D, P.Geol., Vice President of Exploration for Altiplano, is the Qualified Person as defined in National Instrument 43-101 who has reviewed and approved the technical contents of this press release.

### **About Altiplano**

**Altiplano Minerals Ltd. (APN: TSX□V)** is a mineral exploration company focused on evaluating and acquiring projects with significant potential for advancement from discovery through to production, in Canada and abroad. Management has a substantial record of success in capitalizing opportunity, overcoming challenges and building shareholder value. Additional information concerning Altiplano can be found on its website at [www.altiplanominerals.com](http://www.altiplanominerals.com).
